Sim Gallery

Posted by phillipx - 21 Jan 2011 02:34

Hello,

I'd need help with analytics for albums and photos.

I'm using sim gallery component and I don't see any stats for albums and photos which is most important part of my site (Portfolio community)

Please help,

Phillip

Hello Phillip,

Thank you for your interest in our products.

About the feature you mention, Sim Gallery is not part of JomSocial and, as it seems, it does not use the album/photo datamodels included in JomSocial.

In order to work with Social Analytics, we'd need to process the Sim Gallery datamodels and develop new report types for them. And we need to do just that for every JomSocial addon that does not use JomSocial datamodels.

That can be a lot of work, believe me.

Here is what we can do:

Allow us some time to get to finish release v2.0 (that will include many new features). In the meantime, if anyone asks for this same feature, we'll buy a SIMGallery subscription (almost 70 €) and develop new report types, and configure the SIMGallery integration into Social Analytics.

What do you think?

Kind regards.
