

Report by SKU?

Posted by jason - 10 Aug 2014 12:15

How do I view the report by SKU? Want to find out how many sales ordered for each SKU.

=====

Hello Jason,

Sales reports by product are located inside the **Products** report area.

To set the tool to display the product SKU's, go to Sales Analytics --> Configuration.

Under the Integration & Catalog section, you can set the product reports to display either the Product Name, the Product SKU, or a combination of both using a custom separator.

Kind regards.
