

Tax amount not shown in reports

Posted by cmezan - 15 Feb 2016 20:27

In Virtuemart we have tax calculation setup for our store (Type of Arithmetic Operation= Tax per bill) and orders are collecting the tax. However the tax amount is not shown in the reports. All reports show the tax as \$0. The tax is setup for the United States for one state only.

Can anyone assist with this issue? If support issues should be reported elsewhere let me know. Thanks.
