_____

It doesn't look like anybody is going to respond to these problems but I thought I'd throw in that the blank page is being caused by an error in the code:

[Tue Mar 22 14:40:36 2016] [error] PHP Fatal error: Call to a member function get() on a non-object in /administrator/components/com_atend/lib/export/spreadsheet.php on line 36

Line 36 is:

$currency_format = trim($sa_config->get('currency_format'));

It appears to not be picking up any configuration variables.
