

## SSL Issues

Posted by Kyrian - 28 Jun 2016 01:58

---

Hi,

I bought the SA version on Virtuemart Extensions site. Everything was fine, I love the component, but sinc I've moved from HTTP to HTTPS, the daily order disappear from the report page.

Any help will be appreciate.

Regards

Don't expect any help from latitudweb.

My solution to this problem:

Download all com\_salesanalytics and com\_atend files and use a find and replace tool to replace all http: with https:

Upload the changed files and the SSL problem is solved.

Regards,

Dorine
