track downloadable and report

Posted by chrisadam - 20 Mar 2012 06:57

Hi can these analytics pull up a report of downloadable products that are free in the virtuemart system and give analytics on them like ammount downloaded, where the client is coming from, and so on?

Hi crisadam,

That's a good question. Sales Analytics is designed for sales (thus its name), both downloadable goods or not, but at the moment it does not handle free downloads.

Anyway, it could be a good feature to add in future releases. If you need some specific reports in these area, please let us know, and we'll use your feedback to design a new section.

Kind regards.
