Configuration Error

Posted by smartin - 03 Nov 2011 01:37

We are getting the error:

Fatal error: Class 'SocialAnalyticsConfig' not found in /home/hpsocial/public_html/sharesafe/administrator/components/com_socialanalytics/views/report/tmpl/layout3.php on line 33

when accessing "Activities by User" report.

Any ideas?

Yes, you're right, there was a bug there.

We have already released Social Analytics v1.2.1 to work it out. You can get it on our download section here: analytictools.latitudweb.com/downloads/d...ocial-analytics.html

Thank you very much for your feedback.

Kind regards.
