Display of Analytics different then demo site, CSS problem?

Posted by stiponline - 28 Nov 2016 10:36

_____

The CSS file seems to be different then your demo site. My fonts are to big, therefor the left items are not displayed nicely.

If I look add loaded css files, these are:

Embedded CSS from administrator/index.php?option=com_salesanalytics

/administrator/components/com_salesanalytics/assets/css/report.css

/administrator/components/com_atend/assets/css/report.css

/administrator/components/com_atend/styles/modern/css/report.css

Is there perhaps an update on the CSS files?
