Select Sales Analytics in Magento Permissions User & Roles

Posted by ffab - 16 Dec 2013 08:44

Hi,

a new feature wish would be to be able to select Sales Analitycs when creating a Role in Magento. I think by now Sales Report is only avaible to administrators. Would be nice if we can use Magento feature to create a personnal role and selecting Sales Analytics from there.

Regards,

==========

Hi ffab,

Yes, sure. We take it into account for our next release.

Kind regards.
