Error: Invalid request

Posted by latitudweb - 21 Aug 2013 13:58

SALES ANALYTICS for MAGENTO uses an external keys server that prevents unauthorized access to your sales data.

If this access is not authorized or contains wrong data, the external server raises an invalid request error. This can be due to many reasons, including wrong or missing subscriptions keys, malformed requests, or others.

If you are getting any of these errors, have purchased a subscription, and have registered your domain, please contact us and we'll help you with the issue.

Hello..

I sent email yesterday and haven't received a reply. I'm receiving ERROR_105:20bea53 on my install at dope.com. Reports are not functional, only one report loads. Please advise
