Fatal error when data export button is pressed
Posted by sergio0187 - 09 Nov 2016 11:44

_____

Hi,

I get this error with any data export:

 Fatal error: Call to a member function get() on null in /home/rexdev/public_html/bozikova2/administrator/components/com_atend/lib/export/spreadsheet.php on line 36

screencast.com/t/stAyDvhXV

_____

I have the same problem.

Would be nice to get some response from BEIT

_____

i get the same error too, as well as product attribute reports.

i tried calling their phone number and they speak only spanish.

not one speaks english, would appreciate help, on translations.

_____

Found the solution for this problem.

Open spreadsheet.php and find on line 34

$sa_config =& JRequest::getVar('sa_config');

and replace with:

$sa_config =& JFactory::getApplication('sa_config')->input;

Regards,

Dorine

_____

I applied the fix, and now I can at least export a table to a file. Thanks.

I have to add the extension to the file when saving since the app does not do it itself.

This bug is still in the app after being reported over a year ago???
