

different taxes for products in my site

Posted by tatomixes - 15 Dec 2011 10:50

Hi there, I need to have a taxes report but in my site apart from the delivery taxes we have different taxes for products as in Spain we have food taxes etc, Is there any way to have reports showing each tax?

Thanks

Hi tatomixes,

We also live in Spain and know about the different taxes that applies to specific products.

Starting with version 1.5, Sales Analytics displays tax reports for each tax that's used in the online shop.

In your case, you can get food taxes reports, and any other individual report for each type of taxes you use.

Kind regards.
