

Support and Cron

Posted by Manuxx - 08 Nov 2015 19:16

Hi

We were quite surprised reading about new version for joomla 3 and virtuemart 3.

We though extension was dead.

The question is simple, we see this is just an update with no features added, the cron job was requested and you talked about it years ago.. we dont want to buy until we are sure there is actually some kind of support and a word about the Cron feature would be nice.

Questions in the forum were not answered for years, literally so lets try before buying.

Regards

=====
